

产品大类	标准号	代表牌号	厚度	宽度	用途及特点
涂镀基板用冷轧钢带 Cold rolled strip used for coating substrates	Q/ASB 110	TD1	0.4-2.0	900-1580	具备较高的表面质量，一定的延展性，经电镀锌后，可以简单成形。主要用于简单成型用电镀锌基板。 A higher surface quality and ductility, by electro galvanized, can simple forming. Can be a simple forming electro galvanized substrate.
		TD2			具备较高的表面质量，较好的延展性，经过电镀锌后，可以用于简单的冲压成形。主要用于简单冲压成型用电镀锌基板。 High surface quality and ductility, good performance for stamping, electro galvanized substrate.
		TD3			具备较高的表面质量，良好的延展性，经电镀锌后，可以用于较复杂的冲压成形钢。主要用于复杂冲压成型用电镀锌基板。 With high surface quality, good ductility, by electro galvanized, can be shaped steel for stamping complex. Mainly used for complex stamping molding electric galvanized substrate
